RECEIVING & INSTALLATION

Please read this manual in its entirety before operating your press.

UNPACKING

Remember to save all packing materials - including any crating, boxes, liners and boards. You may need these for shipping your machine or should a repair be necessary in the future.

INSPECTION

Inspect your machine for hidden shipping damage. Contact the delivery company immediately, should you find damage.

PLATEN SURFACE

Slight surface imperfections are a normal part of the aluminum casting process for the platens on your press. These are not considered a defect and do not affect the functionality of the machine in any way.

NOTE: Upon receiving your new equipment, some debris or residue may be present on the aluminum platen(s). Clean the platens per the instructions provided prior to first use.

INSTALLATION

Remove from box (Keep box just in case you need to return). Team lift machine is very heavy.

OPERATION

1. With the press in the open position, adjust the press to the desired thickness by turning the thickness control knob located on the top of the machine. Thickness is reduced by turning knob **clockwise** and increased by turning it **counterclockwise** as indicated. Using the thickness control knob, turn right for thicker or left for thinner until you have the thickness you desire.

CAUTION: DO NOT OPERATE THIS PRESS WITH ANY OTHER PERSON(S) / HAND(S) NEAR YOU OR THE PRESS. SERIOUS INJURY COULD RESULT.

2. Pull down the handle all the way, applying pressure, until it stops. Raise the handle all the way up.
3. Rotate the lower platen out and remove your flattened product.

OPERATION

WARNING: Before cleaning, performing maintenance or repairs make sure the machine is turned off and the machine is unplugged.

******This appliance is not waterproof. Never spray or pour water or any other cleaning solution onto this appliance.******

CLEANING PTFE COATED PLATENS

4. Open the press for easier access.
5. Clean the platen(s) with a mild soap and warm water applied with a soft cloth or sponge. Do not use steel wool, scrub sponges, kitchen or oven cleaners or any other kind of abrasive material. This will damage the platen.
6. Wipe clean with a dry cloth.

CLEANING OUTSIDE SURFACES OF THE MACHINE

Use a mild soap and warm water applied with a soft cloth or sponge. Do not use steel wool, scrub sponges, kitchen or oven cleaners or other abrasives that will damage the surface.

LUBRICATION

Your press requires lubrication every 15,000 cycles or every 6 months. Lubricate weekly in a heavy use production environment. Use NSF/NLG12 rated food grade grease (such as Bel-Ray No-Tox #2 or equivalent). A general purpose food grade machine oil spray is also acceptable such as CRC03055 lubricant (available from retailers such as Amazon). Lubricate all moving or hinged points.
